

# CASADEI

CASADEI RESORT 2021

The Spring/Summer 2020 collection perfectly represents Cesare **Casadei's** fighting spirit and determination to face the challenges of **contemporary's** world. The collection was quickly developed but it still offers a wide range of creative ideas.

Summer views where the eyes indulge in thousands of shades of blue at the line where water meets sky or get lost among the light refractions in the desert landscape. Neon flashes and pop prints awake the senses by capturing the attention and putting the focus with fluorescent touches on a new *joie de vivre*.

In particular, the Spring/Summer 2021 collection, **it's** a declaration of love of a family to its own territory, where traditions and craftsmanship have being cultivated and nourished for over 60 years with passion and dedication.

Shoe making is an ancient art, almost sartorial, handed from generation to generation, putting the focus on artisanal skills and on product quality, as well as on the selection of special details and an extraordinary fit. Raw cut straps with exquisite stitchings feel like sartorial tackings, while lightly padded insoles lift the posture of cage sandals showing a minimal, sophisticated look.

The foot becomes the focal point thanks to the tiny infinite-shaped cutouts or to the little contrasting bows creating a see-through effects on the heel. Each material is carefully selected to express this desire of re-starting.

Patent leather gets a vivacious makeover thanks to neon shades matched with black and to the Leo Pop animal print. Denim is dyed in a sea blue bold color with a stone wash effect and is peppered with a new natural calf skin C-Chain label.

Warm, earthy tones, including Sienna, Canyon and Dafne, appear on delicate nappa leather and soft suede.

The night sparkles with jewel-like hand embroidered macro stones enriching sandals and mules - they are Cesare **Casadei's** loving homage to the unparalleled skills of San Mauro **Pascoli's** embroidery maestros. Lights defines each material, including fishnet decorated with micro crystals or more innovative options, including the Incal vegan leather covered with micro sequins.

*“Resilience is the term that best reflects the spirit of my Spring/Summer 2021 collection. This is a full lineup, produced in only few weeks as a response to such a dramatic event which really shock the whole world. Facing such a traumatic moment, I decided to react with positivity, accepting the reality, reorganizing my team and developing a creative storytelling where timeless designs meet highly innovative elements. Being resilient is definitely part of my DNA and it perfectly matches with my mantra: looking back to go ahead!”* Cesare Casadei, Creative Director.
